innovation
large scale 3D printing

- weight: 2 tons
- height: 2,55 m
- printing sizes:
2,40 x 1,40 x 1,30 m

Our large scale 3D printer is based on a robot used in the car industry. An extruder transforms recyclable thermoplastic pellets into hot filaments that are then placed on top of each other in successive layers to create the end product.

3D printing creates a wide variety of new opportunities, especially in terms of design and high-quality finishing.

Design it! Print it!

This process has enabled us to create local manufacturing jobs, bringing a home-grown, 'Made in France' revolution to the French industry.

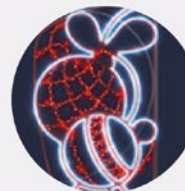

It reduces the number of links in the logistics chain, meaning the product is made where the need exists, in a business where sustainable development is a central concern.

We can now meet your needs by producing unique custom-made products as one-offs, or in small quantities, creating extraordinary projects built around you..

The creation of our **new DecoPrint range** has been inspired by creativity, innovation, design and concern for the environment, giving our customers a **one-of-a-kind experience** and realising their innovative lighting ideas in towns and shopping centres with large scale 3D printing.

Producing tailor-made components for your projects

Deco print

NEW!
2017

The latest revolution in technology:
The Deco print range.

Developed and manufactured in our workshops
in France, a new design generation was created.

A giant 3D printer produces your lighting
decorations and sculptures with the utmost care.
100% recyclable Deco print resin replaces all or
part of the aluminium structures. With its transparent
and reflective surface, your lighting installations
shine even brighter.

Design it! Make it!

Our designs consist of:

- 1 - A varnished aluminium structure.
- 2 - A coloured Deco print resin motif which is
highly-detailed, as well as delicately sculpted.
- 3 - Light components, fireflies and LED
ropelight, with cables and ties to match the struc-
ture's colour.

What makes this collection so great?

100% recyclable
coloured Deco print
resin for both day-
time and night-time
decoration.

Our designs are
Flash-animated.

All the designs in
the collection are
equipped with
Switch boxes.
