

NORDIKA

NORDIKA, AS REALISTIC AS A NATURAL ONE

Who doesn't love a fabulous Christmas tree?

And yet, it takes between 30 and 40 years for a natural conifer to reach 12m in height. As we want to avoid deforestation by halting the felling of these majestic trees, we invented NORDIKA. Pre-illuminated with a slowglow effect, easy to assemble and store, they are perfect replicas of their natural version, both in their design and in their incredibly realistic appearance - as true to life as it gets.

Our environmental approach is based on a simple principle: to save at least as much carbon as we generate. We do this by only using biocompatible materials, which we recycle at the end of their lifespan.

This tree can be customised, and above all, reused for several seasons.
