

1. INITIAL MEETING

Enables us to understand your vision and budget as well as potential technical issues involved in the project.

2. BRAINSTORMING SESSION

Our design team will work with you to create your own design with energy and impact, helping you to choose the right colours, light and concept.

3. MATERIAL, LIGHT, AND ENGINEERING TECHNIQUE STUDY

Economic and technical studies are carried out at the same time as the artistic design by both the project team and the Research & Development department.

4. PRODUCTION IN A PERSONALISED WORKSHOP

We do everything by hand in our workshops, from specialist aluminium work to the most complex wiring; proof that you can stand for an idea of excellent craftsmanship.

5. DELIVERY TO SITE

Each project is delivered to the installation site by our logistical with every part is packaged to ensure maximum protection.

6. SETTING UP THE ILLUMINATIONS

Our professional assembly team can carry out the installation work either during the day or at night, depending upon your specific requirements. The system will also be fully tested prior to launch.

7. LIGHTING OF THE PROJECT

This is when the magic happens. The switching-on of the illuminations is a party which draws crowds and Blachère illumination can help you to organise this luminous event!

8. AFTER-SALES SERVICE

Telephone support is available 24/7 to answer your questions and fulfil your expectations. We aim to satisfy every single client.

9. DISMANTLING

The teams who handled the assembly also take care of the dismantling in order to optimise this stage of the project. The lighting designs are returned to their personalised racks so that they are protected and can travel quite safely.

10. MAINTENANCE AND STORAGE

Once they are back at our factory, the sets are inspected and repaired before being stored away, ready for next year.
